SUPER SPECIAL BLADE CLEAN 3G - YOUR ANILOX'S ARE ALWAYS CLEAN. A COMPLETE TOTALLY AUTOMATED SOLUTION FOR YOUR PLANT

SUPER Special Blade Clean 3G

New generation chemical technology

Super Special Blade Clean 3G is formulated for use through Clean Print's automatic cleaning system as well as printing plates through automatic foaming equipment. This is cutting edge new chemical technology with a unique, breakthrough blend of safe, water based solvents to liquefy dried ink rapidly without any corrosive effect on equipment. This system *SAVES YOU TIME*, saves you money, reduces maintenance, increases production time by reducing downtime, gives a better print every time, reducing ink wastage and faulty product returns - *GUARANTEED !*

Summary of benefits to the Corrugated Box Industry

- Centralized automatic cleaning system for all converting lines
- Automation eliminates chemical cleaning Health & Safety issues
- Tidy, simple and automatic
- Reduced manual labour for Anilox Roll Cleaning
- Increased production time with less breakdowns
- Superior printing
- Reduced time between changeovers
- No handling of chemicals so reduced OH&S issues
- Reduction in the use of ink and water
- Reduces maintenance so engineers can focus on continuous improvement
- Product formulation will not corrode doctor blades or blister anilox rolls or damage rubber rolls and seals on bearings
- Product is delivered diluted 1:50 to the operation point so usage is controlled
- Automation permanently ensures guaranteed results with less risk
- Significant direct and indirect cost savings
- Non-Corrosive Non-Hazardous
